MOCOM AUSTRALIA

B Classic

*Designed with performance, Reliability &
Safety in mind.*

- LCD display with keypad and test reminder. Never forget to run important Vacuum & Helix tests.

- Performance vacuum pump for speed and reliability

- Optional Barcode and cycle report printer. Track critical instruments digitally.

- Delayed start so Vacuum and Helix tests can be programmed to run before a practice opens. A real time saver.

- Wi-Fi and Ethernet port are standard inclusions so Steriliser can be networked.

- User management system allows users to be tracked to cycle data via personal PIN codes. Complies with Australian and NZ standards and means no paper printout is required.

- Cycle data saved as a PDF file meaning no software required to save data. Can be downloaded to PC via included USB.

- Steriliser can be installed as a stand alone device or connected to external R/O systems & Autofill options. Multiple solutions to cover varying installation requirements.

- Built in water conductivity sensor to ensure water quality is always at it's best.

- Software available to manage automatic upload of cycle data. Traceability software available to track critical instruments to the patient.

Industry leading 3 year or 3,000 cycle warranty!
