# Locating & Installing Tap
## (15L Drum)

When a drum arrives,
the tap is not visible

Unscrew the large cap at the top to locate the tap under the cap

The tap is removed from the cap by unscrewing in an anti-clockwise direction

Replace the cap and tighten

Lay the drum over so that the small "bung" below the label faces up

Unscrew the "bung" using the spanner or similar tool, by turning anti-clock wise

Screw the tap into the "bung" thread

ENSURE THE TAP IS TURNED OFF

Return the drum to the upright position

ENSURE THE TAP IS IN THE OFF POSITION

"Let's Get it Right"

Drum spanners are available on request
