

New Product Release

Special offers available from 1/8/2016 to 30/9/2016 (Only While Stocks Lasts)

Kerr™

Introducing Herculite® XRV Ultra™

Kerr is very excited to announce the introduction of Herculite XRV Ultra, our New Universal Nano-filled Composite. Made in Italy, New in Australia.

Clinical case courtesy of Prof. Angelo Putignano University of Marche, Ancona - Italy

Herculite XRV Ultra is a universal composite material with excellent aesthetics for anterior restorations and is strong and durable for posterior restorations. The shading system enables various shading techniques based on the different aesthetic requirements -1-layer, 2-layer or multi-layer techniques. Its balanced consistency allows easy placement in anterior as well as good packing in posterior cavities

Key Features & Benefits:

- **Improved aesthetics.** Natural opalescence and fluorescence for lifelike appearance of final restoration.
- **Improved handling.** Non-sticky, non-slumpy formula with great sculptability and adaptation to tooth.
- **High mechanical strength.** For the durability and reliability the Herculite brand stands for.
- **Proven technology.** Sound technology based on the original Herculite XRV platform brings
- **Life-like aesthetics** with superior polish.
- **Versatile shading system** - 1-layer, 2-layer and multi-layer shading technique.
