COURSE TOPICS

Digital dentistry is without a doubt the future of dental practice. CAD/CAM has evolved significantly over the years and provides dentists with unrivaled accuracy and control. CAD/CAM Dentistry is now the most effective and efficient way to deliver high quality restorations to your patients in a fraction of the time and cost.

Let us show you how easy, profitable and enjoyable digital dentistry can be and get you well equipped for the future of dentistry.

This presentation is for anyone who wants to take their first steps into CAD/CAM or for new CAD/CAM owners that would like to kick-start the learning process on how to use this fantastic technology. You will be guided through the entire digital workflow from Scanning accurately to Designing, Milling and Glazing restorations that look more natural than ever before. Explore the possibilities with 3Shape Trios and Planmeca Emerald Scanners as a demonstration of the workflow is carried out. Upon completing this course you will gain an in-depth understanding of CAD/CAM and the digital workflow.

WHAT'S NEW IN CAD/CAM - AND HOW CAN I MAKE IT WORK FOR ME?

Presented by Dr Hamid Al-Hassiny

Friday 29th June 2018
Henry Schein Training Facility
23A William Pickering Drive,
Albany, Auckland

PRESENTED BY

Dr Hamid Al-Hassiny

Dr. Hamid is an early adopter of CAD/CAM technology having used CAD/CAM for close to 10 years during which he has completed over 4000 restorations.

Dr. Hamid has advanced clinical experience in three different CAD/CAM systems: CEREC, Trios and Planmeca, and uses all 3 systems daily in his practice in many fields of dentistry including single tooth dentistry, full mouth rehab, digital smile design and dental implants.

He has an infectious drive for mastering digital dentistry, running his own CAD/CAM courses and helping teach many dentists including his associates the many facets of digital dentistry and its benefits.

LEARNING OBJECTIVES

- Learn the advantages of CAD/CAM and Digital Dentistry and how it can change your practice.
- Learn how to accurately take a Digital Impression using CAD/CAM and Design and Mill a restoration.
- Learn the key principles of CAD/CAM in restorative dentistry to ensure seamless fitting restorations that require no adjustment.
- Understand the specifics of CAD/CAM ownership; subscriptions, costs, maintenance and calibration.
