“ Francisco is a very knowledgeable and experienced mentor. I have gained invaluable experience in his live implant surgery course, which boosted my confidence in implant placement, especially when placing multiple implants. ”

Dr Nick Song. Wellington

“ One of the best hands on implant CE course's I have been on. Francisco is very approachable and genuine, and very willing to teach and share his wealth of knowledge. Plus a trip to visit Peru was a great bonus. Highly recommended for anyone who wants to take their implant surgical skill further. ”

Dr Bob Yang. Auckland

“ There's only so much you can learn from attending lectures and reading books and articles, so Francisco's hands-on practical approach gave me great confidence in moving forward with my implant dentistry. His knowledge along with his teaching skills that enable him to impart that knowledge are fantastic, especially for General Dentists. ”

Dr Dylan Yung. Auckland

Dr. Juan Francisco Pardo

Dr. Juan Francisco Pardo obtained his dental degree from Cayetano Heredia Peruvian University (UPCH) in Lima, Peru. He completed a fellowship in Periodontology at his alma mater. He was part of the AEGD program at the University of Connecticut where he did a residency and a fellowship. In the meantime, he obtained the license to practice dentistry in the state of Florida. Afterwards, Dr. Pardo attended the University of Alabama at Birmingham (UAB) and the VA Hospital in Birmingham, and was trained to do IV sedation; he also received his degree in Periodontology and a Masters in Science.

Dr. Pardo is a member of the American Academy of Periodontology and is actively involved in the APPO (Peruvian Association of Periodontology and Osseointegration) among other important dental associations. He is an active national and international speaker, lecturing in society meetings, webinars and workshops in different topics related to oral implantology and periodontics. He is also Colgate's national and international speaker for Latin America.

Nowadays, Dr. Pardo shares time between his private practice limited to periodontics and implant dentistry, as well as faculty member at the Periodontology postgraduate program at the School of Dentistry of the Peruvian University of Science (UPC). He also dedicates time as Founder and Director of Fusion Dental Educación Continua, building strong scientific curriculums in different disciplines to promote continuing education for clinicians in Peru as well as abroad.

Day One: Implants 001

This lecture is essentially 'Implantology in a Day'. It will be a case based presentation targeted at both young dentists wanting to move into implant dentistry and also those who have dabbled and want to gain confidence and expand their basic skills.

Topics Covered:

- Basic Anatomy
- Digital Planning
- Flap Design
- Implant Placement (immediate and delayed)
- Second Stage Surgery
- Provisionalisation
- Final Prosthetics
- Ridge Preservation and Horizontal GBR

Day Two: Advanced Placement, Sinus Lifting and Complications

If you have been placing implants regularly this program has been designed to upskill your existing techniques as well as introduce some new concepts relating to more complex cases and addressing complications.

Topics Covered:

Immediate, Early and Late Implant Placement. When and Why? Single and Multiple Implant Cases (3hrs)

- Post extraction ridge alterations
- Indications and case presentations for immediate, early and late implant placement
- Bone grafts, barrier membranes, acellular dermal matrix and connective tissue grafts used for all of the situations above

Treatment Planning and Current Techniques in Sinus Elevation (1.5hrs)

- Maxillary Sinus Anatomy
- Implant Selection
- Crestal and Lateral Sinus Lift Techniques
- Biomaterial uses in Sinus Elevation
- Case Presentations

Horizontal Ridge Augmentation: Horizontal GBR and Ridge Splitting (1.5hrs)

- Post Extraction Ridge Alterations
- Classification of Defects
- Implant Planning and Placement in Deficient Ridges
- Indications for Horizontal GBR and Ridge Split Techniques
- Use of Piezosurgery in Ridge Split Technique
- Case Presentations
