Speaker

Dr Imran Cassim BDS, MSc

Imran Cassim qualified with a BDS degree from the University of WITWATERSRAND in 1999.

He attained distinctions in Physiology, Pharmacology and Anaesthetics during his undergraduate study.

In 2009 He completed his Post Graduate Diploma in Endodontics at the the University of PRETORIA (cum laude). He achieved second place for his case presentation at the European Endodontic Forum held at Interlaken, Switzerland in June 2011. In 2014 he completed his MSc at the University of Pretoria. He moved to Tauranga ,New Zealand in 2017 and is currently working at Pyes Pa Dental.

Steve Shepherd

BSc, MSc, PhD (in-complete)

Steve completed his BSc (Hons) in Biochemistry in 1984 in Otago and received a scholarship from Gene Stock NZ to study a PhD in Immunobiology. In 1989 moved to the UK to work with

Septodont developing training in Dental Anaesthesia in Endodontics. Much of this time was devoted to developing training in basic skills in Endodontics. Developing courses with Key Endodontists in the UK and Europe as well as development of Endodontic Surgical DVD training courses.

Attending many major Endodontic meetings around the world for the past 20 years and working with many major Universities and Research institutions developing research into Endo File development and root canal sealers. Having setup Endo training in most of Asia for the past 15 years – I'm really excited to develop clinically relevant Endo treatment strategies for Henry Schein New Zealand.

Endodontic Challenges Henry Schein Solutions

Endodontics Hands On Course – No More Working in the Dark

Because of the emotional effects that Endo procedures can elicit, overcoming the associated challenges in each step of the workflow can have a big impact, on both the patient and clinician.

Saturday 12th October 2019

AUCKLAND

'Working in the Dark': Swedish general dental practitioners on the complexity of root canal treatment.

Dahlstrom, Lindwall, H. Rystedt & C. Reit

One striking impression when reading the interviews was the reported emotions associated with root canal treatment. Almost all the dentists expressed feelings such as anxiety, frustration, discomfort, stress or exhaustion. As one of the dentists put it: 'You're just mentally exhausted when you finish a root filling' (A5). RCTs were often considered to be more complex and problematic than other areas: 'I think root fillings are difficult. There are many steps that could go wrong.'

THIS HANDS ON COURSE WILL FOCUS ON...

The essentials that make Endo predictable.

The work flow and essential skills to remove some of the frustration associated with endodontics. Skill sets will include

- Access preps – (and why they matter so much)
- Canal location – which canals am I missing?
- Obturation – Warm or Cold condensation?
Does it matter?
- Negotiation – get to WL and prevent loss of WL
- Shaping – Prevent drag in and File separation

ULTIMATELY

To explore elements of reasoning and understanding that might obstruct the performance of good-quality RCT. Epidemiological surveys of different populations unanimously find a clear link between substandard quality and the presence of radiographic signs of apical periodontitis. All attendees will benefit from up-skilling in one or more areas above.

Learning objectives

1. Know the Laws of canal location
2. Use of Ultrasonics in finding the above
3. Why canals can be challenging to negotiate. Overcome these problems
4. Master cone fit
5. Reduce post op flare-ups

Please bring Extracted teeth and have access cavities pre-cut. Don't forget your Loupes – magnification and lighting are essential in endodontics.
