Speaker

Dr. James A. Wealleans

Dr. James A. Wealleans is originally from Christchurch New Zealand. He is married and has 2 children. In 2006 James graduated with honours from Nova Southeastern College of Dental Medicine in Fort Lauderdale, Florida. A year later

he completed an Advanced General Dentistry Residency in Colorado Springs, Colorado. In 2010, James graduated with an Endodontic Residency from the prestigious University of Texas Health Science Center and Wilford Hall Medical Centre in San Antonio, Texas. James is an American Board-Certified Endodontist, an accomplishment that only 20% of Endodontists in the specialty obtain. James served as the Director of Endodontic Residency Training and Education from 2013 to 2018 at the Wilford Hall Medical Centre. He has held teaching appointments as Associate Professor with the Uniformed Services University of the Health Sciences, and Assistant Professor with University of Texas Health Sciences. James has also authored over 10 published research papers and serves as a Scientific Advisor for the Journal of Endodontics.

Steve Shepherd

BSc, MSc, PhD (in-complete)

Steve completed his BSc (Hons) in Biochemistry in Otago at the end of 1984 and received a scholarship from Gene Stock NZ to study a PhD in Immunobiology. In 1989 he moved to the UK to work with Septodont developing training procedures in Dental Anaesthesia in Endodontics and Basic Endodontic Skills. Steve ran courses with Key Endodontists in the UK and Europe, and produced DVD training courses in Endodontic Surgery.

Steve has attended many major Endodontic meetings around the world in the past 20 years, and worked with major Universities and Research Institutions looking at Endo File development and Root Canal Sealers. Having conducted Endo training in most Asian countries he is now excited to be developing clinically relevant Endo treatment strategies for Henry Schein New Zealand.

Endodontic Challenges Assessment Diagnosis and CBCT

Endodontics Hands On Course –

Because of the emotional effects that Endo procedures can elicit, overcoming the associated challenges in each step of the workflow can have a big impact, on both the patient and clinician.

Friday 16th August 2019

CHRISTCHURCH

If modern clinical techniques were carefully followed, many common endodontic problems would never occur. Incorrectly designed access cavities may make root canals both difficult to identify and to instrument. Many root canals, particularly in the elderly patient, are difficult to locate. The pulp chambers may be sclerosed or contain large pulp stones and the root canals may be so fine that even when located they are difficult to negotiate. These are but a few challenges.....

Having many 'Tips and Tricks' to overcome specific problem solving in Endodontics is critical ...

One of the excellent topics in this full day Hands on is "negotiating very narrow canals!"

THIS HANDS ON COURSE WILL FOCUS ON...

- 1 Assessment Diagnosis and CBCT (What are we looking at, 2D/3D Perceptions)
- 2 When to refer – is there a protocol to follow in decision making i.e. - when to refer to AAE Guidelines
- 3 Isolation – it's easy – its quick!
- 4 Hot Pulp – anesthesia (LA, Wand STA)
- 5 Access, Ultrasonics, MB2's, Negotiation, Glide Path, pulp anatomy/physiology, locating and negotiating difficult canals.
- 6 Shaping, Working Length – Reciprocating, Rotary, Hand
- 7 Irrigation Protocols
- 8 Medication Protocols
- 9 Obturation – Single Cone/Bioceramics, Vertical Condensation
- 10 Restoration – Considerations/requirements, techniques, challenges
- 11 Hands on Negotiation/Shaping/Obturation

LEARNING OBJECTIVES

- 1 Improving Negotiation Skills
- 2 Becoming more consistent in WL techniques
- 3 Obturation Skill Enhancement
- 4 Value of CBCT
- 5 Why endodontically treated teeth fail and how to prevent failure (or at least delay it as long as possible)

WHAT TO BRING

- Extracted teeth with access cavities
- Loupes
