

Speaker

Dr Abdul Aziz BDS/D Clin Dent

Dr Aziz graduated from the University of Otago with a Bachelor of Dental Surgery (BDS) in 1995.

After 11 years as a general dentist in New Zealand and Australia, Dr Aziz completed a Doctor of Clinical Dentistry (DClinDent) in Endodontics at the University of Otago. Dr Aziz practiced as a specialist endodontist in Melbourne and returned to New Zealand in 2010. Dr Aziz has published articles in international and local endodontic journals. He has also authored a chapter in the Methods of Molecular Biology text book.

Steve Shepherd

BSc, MSc, PhD (in-complete)

Steve completed his BSc (Hons) in Biochemistry in 1984 in Otago and received a scholarship from Gene Stock NZ to study a PhD in Immunobiology. In 1989 moved to the UK to work with

Septodont developing training in Dental Anaesthesia in Endodontics. Much of this time was devoted to developing training in basic skills in Endodontics. Developing courses with Key Endodontists in the UK and Europe as well as development of Endodontic Surgical DVD training courses.

Attending many major Endodontic meetings around the world for the past 20 years and working with many major Universities and Research institutions developing research into Endo File development and root canal sealers. Having setup Endo training in most of Asia for the past 15 years – I'm really excited to develop clinically relevant Endo treatment strategies for Henry Schein New Zealand.

Reciprocation – Technical Guide to Shaping

Hands on course

Saturday 16th November 2019

PALMERSTON NORTH

Register now!

Date: Saturday 16th November 2019

Venue: Hotel Coachman,
140 Fitzherbert Ave, West End, Palmerston North

Registration: 9:00am

Start: 9:30am

Finish: 4:30pm

Cost: \$550.00 + GST

Register online with Credit Card at

www.henryschein.co.nz/educationandevents

OR email the following details to events@henryschein.co.nz

THIS HANDS ON COURSE WILL FOCUS ON...

The concept of using a single NiTi instrument to prepare the entire root canal is interesting, because the learning curve is considerably reduced as a result of technique simplification and reduction of the endodontic armamentarium. Moreover, the use of a single NiTi instrument is likely to be more cost-effective than the conventional multifile NiTi rotary systems. Reciprocation motion is believed to prolong the life span of NiTi instruments and their resistance to cyclic fatigue compared to continuous – Reciprocation failure rates appear significantly less than in Rotary – 2.4% for Rotary versus 0.47% for Reciprocation.

This course will introduce you to the latest in Reciprocating Technology including some of the most advanced File Systems currently available. The course is of interest to general dentists who would like to advance their clinical skill set to make Endo more predictable and the steps from Canal location/Negotiation/Shaping much more streamlined and affordable.

Learning objectives

- 1 Advanced diagnostic skill – influence of 3D technology and integrating this in work flow
- 2 Identifying and locating Root Canal Systems
- 3 3 Essential skills for NiTi Reciprocation
- 4 One versus two visits endo
- 5 Choice of intra-appointment medicament
