

2017

Attend your choice of full-day CPD approved courses including lectures, demonstrations & hands-on workshops from world class clinicians and presenters.

Dr Mehdi Rahimi & Dr Mark Johnstone

Revealing the Endodontists' Secrets The Total Picture

Dr Mark Johnstone

Mehdi Rahimi is the principal specialist endodontist at Gentle Endodontics (Chatswood and Parramatta, Sydney). He obtained his BDS degree with distinction from the University of Otago (New Zealand) in 2002 and received his Doctorate of Clinical Dentistry (Endo) degree from the University of Melbourne in 2008. Mehdi is actively involved in Endodontic teaching at various continuing education levels, both nationally and internationally. He has been a guest lecturer at the University of Melbourne since 2009. He is also a visiting lecturer at the Universities of Sydney and Charles Sturt. He has obtained a number of publications in the field of forensic dentistry, resin based obturation materials and fractured instruments. In 2000, Mehdi was awarded the Sir Alan Wilkinson award for the most worthwhile research in medicine and dentistry from the University of Otago. He was also awarded the International Association for Dental Research young researcher's award in 2001. Mehdi is an honorary member of the Pierre Fauchard Academy, the current president of the Australian Asian Association of Dentists, the vice president of the Australian Society of Endodontology (NSW) and a member of the Royal Australian College of Dental Surgeons in Endodontics. Mehdi is also a reviewer for the Australian Endodontic Journal.

A full-day course includes half-day lecture & half-day hands-on workshop

North Ryde Saturday 4th February 2017 Courtyard Sydney, 7-11 Talavera Road, North Ryde NSW

Melbourne Saturday 10th June 2017 Stamford Plaza, 111 Little Collins Street, Melbourne VIC

Melbourne Saturday 4th November 2017 *Stamford Plaza*,

111 Little Collins Street, Melbourne VIC

This course is accredited with 8 hours CPD*

Early Bird Offer Available! Mark graduated with a Bachelor of Dental Science with Honours from the University of Melbourne in 2008. He was on the Deans Honours List and winner of the Ernest Joske Prize in final year dentistry. He completed the Doctor of Clinical Dentistry (Endodontics) in 2014 from the University of Melbourne and was awarded the Ephraim Ehrmann Memorial Prize. He currently works privately in both Melbourne and Sydney. He has been involved in teaching undergraduate students and lectured within Australia. Mark is a member of the Australia Dental Association and the Australian Soceity of Endodontology and the Australian and New Zealand Academy of Endodontists.

Participants are encouraged to bring accessed extracted teeth, as well as safety glasses and loupes. All other materials will be provided. Two posterior and two anterior teeth are recommended. Please access these prior to the course.

This one day course is designed to enhance all aspects of your endodontic care, based on current evidence and best practice. A correct diagnosis, in combination with the right choice of new materials and techniques, will ensure an environment that offers an extremely high probability of success and a healthy apical periodontium.

The goal of this course is to provide participants with knowledge and skills to make the practice of endodontics simple and predictably successful. This course will be presented in an interactive seminar which includes case based lectures and a practical component using natural teeth and plastic tooth models.

Dr. Michael N. Mandikos

BDSc (Hons), MS (New York), Cert Pros, FRACDS, FICD

Update in Restorative

Dentistry 2017....

Getting the basics right

A full-day course includes half-day lecture & half-day hands-on workshop...

Dr. Michael N. Mandikos
BDSc (Hons), MS (New York), Cert Pros, FRACDS, FICD

In this one day, hands-on program, Michael will provide an update on what is new in posterior composites (including the latest improvements in the Nanohybrid materials, as well as the indications and use of bulk fill materials), Impression Materials, All-Ceramic Restorations, Provisional Materials and Cements. Specifically, he will address the common problems of post-operative sensitivity in posterior composites and how newer materials can assist to prevent this. Michael will demonstrate a technique for fabrication of a quality provisional crown in those last few moments of the prep appointment, and also explain how to ensure you get your impressions right, every time. There will also be content on bonding and cementation systems and their associated techniques.

This full day program will alternate between lectures and handson exercises, ensuring all attendees are well versed in these new materials and techniques by the end of the course.

During this program practitioners will learn:

- Why patients experience post-operative sensitivity with composites and how you can avoid this
- Update on recent improvements in cements, adhesives and composites for bulk-fill applications
- Correct and predictable techniques for impressions and posterior composites
- What are the all-ceramic systems available on the market and what are their indications
- How to prepare an all-ceramic crown properly for eMax or Zirconia
- Which cement to use for different clinical applications
- How to correctly cement a crown for longevity and without post-operative complications

Dr. Mandikos is a registered specialist in Prosthodontics.

Michael received his Bachelor of Dental Science Degree with Honours, from the University of Queensland and in 1998 he completed a three-year residency program at the State University of New York at Buffalo (USA), graduating with a Certificate in Prosthodontics and Masters Degree in Biomaterials. He has researched composite resin materials and published research papers in Australian and international journals on clinical and dental materials topics, as well as many clinical technique articles in local dental magazines.

Michael is a Visiting Specialist Prosthodontist to the University of Queensland Dental School and formerly to the Royal Australian Air Force. He is a reviewer for several Journals including the Australian Dental Journal and Quintessence International and is a product evaluator for several dental companies. Michael has presented continuing education programs at Dental meetings throughout Australia, Southeast Asia and the USA and maintains a Private Practice limited to Implant and Restorative Dentistry in Graceville in Brisbane's Inner West.

Attendee numbers strictly limited – book early! Three dates only...

Melbourne Saturday 18th Feb 2017 Stamford Plaza Hotel, 111 Little Collins Street, Melbourne VIC

Adelaide Friday 9th June 2017 Adelaide Oval, War Memorial Dr, North Adelaide SA

Melbourne Friday 4th August 2017 Stamford Plaza Hotel, 111 Little Collins St, Melbourne VIC

This course is accredited with 7 hours CPD*

Kerr Professional Education presents International Guest Speaker

Dr Gary Glassman

Endodontic Solutions:

Strategies for Performing Endodontic Treatment Predictably, Profitably and Painlessly

Auckland: Monday 6th March 2017 The Langham Auckland 83 Symonds St Auckland

Melbourne: Wed March 8th 2017 Stamford Plaza 111 Little Collins St Melbourne

Brisbane: Sat March 11th 2017 Stamford Plaza Cnr Edward & Margaret Sts Brisbane

This ONE DAY course addresses breakthrough concepts and details the skills necessary for acquiring the expertise and confidence to perform the highest quality endodontics. You will become familiar with the use of the "apex last" approach to canal shaping with nickeltitanium instrumentation.

Also to be discussed will be predictable irrigation protocols using **Passive Ultrasonic Irrigation** and **Apical Negative Pressure**. Vertical condensation of thermo-softened gutta percha using **The Continuous Wave** of vertical condensation and the **Elements[™] Free Obturation System** will also be discussed.

Join us and learn how to:

- 1) Endodontic Breakthroughs and Concepts allowing the enjoyment of successful endodontic treatment to last a Lifetime.
- 2) Perform a Systematic Diagnostic Protocol and treatment plan
- 3) Emergency Endodontic Treatment
- 4) Tips and Tricks!!!
- 5) Endodontic Regeneration/Revascularization
- 6) Assess the criteria for a successful endodontic procedure
- 7) Accurately locate the apical constriction, and troubleshooting tips.
- 8) Safe use of Ultrasonics in Endodontic treatment
- Shape the root canal space using NiTi technology in a safe and efficient manner- canal negotiation, apical finishing techniques.
- 10)Remove the Smear layer and Biofilm using state of the art Irrigation Protocols Apical Negative Pressure using the EndoVac™ Irrigation System.
- 11)Obturate the root canal system in 3-D to capture the natural anatomy with the continuous wave of condensation using the Elements™ Free Obturation System.
- 12) Restore the endodontically treated tooth.

Dr. Gary Glassman graduated from the University of Toronto, Faculty of Dentistry in 1984 and was awarded the James B. Willmott Scholarship, the Mosby Scholarship and the George Hare Endodontic Scholarship for proficiency in Endodontics. Agraduate of the Endodontology Program at Temple University in 1987, he received the Louis I. Grossman Study Club Award for academic and clinical proficiency in Endodontics.

The author of numerous publications, Dr. Glassman lectures globally on endodontics, is on staff at the University of Toronto, Faculty of Dentistry in the graduate department of endodontics, and is Adjunct Professor of Dentistry and Director of Endodontic Programming for the University of Technology, Jamaica. Gary is a fellow of the Royal College of Dentists of Canada, Fellow of the American College of Dentists and the endodontic editor for Oral Health dental journal. He maintains a private practice, Endodontic Specialists in Toronto, Ontario, Canada. He can be reached through his website www.rootcanals.ca

This course is accredited with 6 hours CPD*

Kerr Professional Education presents International Guest Speaker

Dr Gary Glassman

Endodontic Solutions:

Strategies for Performing Endodontic Treatment Predictably, Profitably and Painlessly

LIMITED ATTENDANCE - FULL DAY lecture and hands-on participation course

Sydney: Friday 10th March 2017 The Hilton 488 George Street Sydney

Also to be discussed will be predictable irrigation protocols using Passive Ultrasonic Irrigation and Apical Negative Pressure, Vertical condensation of thermo-softened gutta percha using The Continuous Wave of vertical condensation and the Elements™ Free Obturation System will also be discussed.

During this exciting fast paced presentation the attendee will receive hands-on experience in a workshop environment.

This program is taught digitally by combining Keynote™, Flash™ animations and QuickTime™ video clips.

Join us and learn how to:

- 1) Assess the criteria for a successful endodontic procedure
- 2) Accurately locate the apical constriction.
- 3) Shape the root canal space using NiTi technology in a safe and efficient mannercanal negotiation, apical finishing techniques.
- 4) Remove the Smear layer and Biofilm using state of the art Irrigation Protocols using passive ultrasonic irrigation and Apical Negative Pressure using the Endo
- 5) Obturate the root canal system in 3-D to capture the natural anatomy with the continuous wave of condensation using the Elements™ Free Obturation System.

in 1987, he received the Louis I. Grossman Study Club Award for academic and clinical proficiency in Endodontics.

The author of numerous publications, Dr. Glassman lectures globally on endodontics, is on staff at the University of Toronto, Faculty of Dentistry in the graduate department of endodontics, and is Adjunct Professor of Dentistry and Director of Endodontic Programming for the University of Technology, Jamaica. Gary is a fellow of the Royal College of Dentists of Canada, Fellow of the American College of Dentists and the endodontic editor for Oral Health dental journal. He maintains a private practice, Endodontic Specialists in Toronto, Ontario, Canada. He can be reached through his website www.rootcanals.ca

Hands-on course attendees need to bring...

Your loupes and lights and extracted teeth (accessed). Two pre molars is recommended.

3D printed molars will be provided.

All other supplies and course notes will be provided.

This course is accredited with 6 hours CPD*

Kerr

Dr Mark Stenhouse

Modern Endodontics for General Practice

tips to make treatment easier and get better results

A full-day course includes half-day lecture & half-day hands-on workshop...

Endodontics can be a technically demanding aspect of dentistry. However, with the continued advancement of technology, the predictability of treatment can be enhanced, along with your enjoyment in providing it. The aim of this course will be to update participants with some of these advancements and provide useful and practical tips to enhance practitioners confidence when undertaking root canal treatment.

During this program practitioners will learn:

- CBCT use in endondontics
- Managing acute pain and "hot" teeth
- Rubber dam tips and tricks
- Finding calcified canals and their preparation
- Establishing working length with apex locators
- Advanced irrigation techniques
- Obturation options and techniques

This course is accredited with 7 hours CPD*

Attendee numbers strictly limited – book early! Two dates only...

Early Bird Offer Available!

Tamworth Friday 24th February 2017

Pavillion Function Centre,

25 Back Kootingal rd, Nemingha, Tamworth NSW

This course is accredited with 7 hours CPD*

Dr Mark Stenhouse

Dr Mark Stenhouse obtained his Bachelor of Dental Surgery from the University of Otago, New Zealand in 2001. He worked for several years as a general dentist in New Zealand, Australia and overseas in both public and private sector positions. During this time Mark became a Fellow of the Royal Australasian College of Dentistry before undertaking postgraduate study.

In 2011, Mark graduated with a DClinDent in endodontics from the University of Adelaide where he carried out research in the field of endodontic microbiology. He is a member of the Australain Society of Endodontology and the Australian and New Zealand Academy of Endodontists. Today Mark works in private specialist practice in Charlestown, Newcastle and talks regularly to study groups on aspects of endodontics.

Participants are encouraged to bring accessed extracted teeth, as well as safety glasses and loupes. All other materials will be provided.

One premolar and one molar are recommended. Please access these prior to the course.

NEW elementsfree

It's time to cut the cord...

"The downpack and backfill of the elementsfree equipment lost the cords but none of the System-B functionality,"

Dr. Steve Buchanan

A System-based Approach:

- Cordless emulation of the Elements Obturation Unit
 - same Continuous Wave downpack tips
 - same backfilling cartridges
 - same performance-without the cord!
- Sleek, coordinated look with ergonomic balance
- Intuitive user interface
- Lithium-ion batteries
- Smooth surface
- JumpStart feature

Contact Kerr on 1800 643 303 to book your no obligation, in-surgery **elementsfree** demonstration

Dentistry*unleashed*

Kerr Professional Education presents

Dr Mike Gordon

BDS MDS (Endo), MRACDS (Endo) Specialist Endodontist

Introduction to
Modern Endodontic
Concepts & Techniques
for the General Practitioner

Attend a one day hands-on course designed for the General Practitioner

Root canal treatment is a difficult and technically demanding aspect of General Dentistry. A greater understanding of the complex nature of the root canal system and advances in microbiological testing mean we have more knowledge to achieve better long term outcomes for our patients.

New developments in file design, materials and motors have made the cleaning and shaping of the root canal system more predictable and safer. This can all be achieved with guided access and dentine preservation strategies to give the tooth the best possible chance of long term survival.

The aim of this one day course will be the introduction of some new concepts in access and preparation and discussion of the chemo-mechanical cleaning of the entire root canal system . There will be many useful take home gems that can be incorporated in your surgery endodontic routine.

The course will be presented with interactive seminar styled case based lectures and hands on components using natural and True Teeth models.

During this program practitioners will learn:

- Thinking in 3D and what CBCT brings to Endodontics
- Anatomy directed access concepts with dentine preservation strategies.
 Discussion of burs and instruments required to achieve this.
- Learn accurate methods of working length determination using different methods with an emphasis on the electronic apex locator.
- Describe irrigation protocols based on current concepts of endodontic microbiology
- Biologically based root can preparation and introduction to Reciprocating TFA files

This course is accredited with 7 hours CPD*

Auckland Saturday 8 April 2017 The Langham Auckland, 83 Symonds Street, Auckland 1010 NZ

This course is accredited with 7 hours CPD*

Participants are encouraged to bring accessed extracted teeth, as well as safety glasses and loupes. All other materials will be provided. One premolar and one molar are recommended. Please access these prior to the course.

Dr Mike Gordon BDS MDS (Endo), MRACDS (Endo) Specialist Endodontist

Mike is currently working in a specialist practice in Hamilton. He graduated BDS from the University of Otago in 1990. After working and owning a share in a private practice in Hamilton for 10 years, Mike completed a Masters of Dental Surgery in Endodontics at the University of Otago graduating in 2004 - with Distinction. He gained membership to the Royal Australasian College of Dental Surgeons in Endodontics in 2005. He has numerous publications in peer reviewed journals and is actively involved in running continuing education courses and lectures. He currently reviews articles for the Australian Endodontic Journal and the New Zealand Dental Journal. He has a special interest in evolving technology in Endodontics and the operating microscope. Mike is a past President of the Waikato Branch of the NZDA and has memberships with The NZ Society of Endodontics, The Australian and New Zealand Academy of Endodontists and the International Association of Dental Traumatology

Attendees of this workshop will receive a 50% Course Discount when enrolling for the two day, Advanced Endodontic Concepts

Queenstown presentation in September!

Attend a two day hands-on course designed for the General Practitioner and make a weekend of it!

This two-day course is designed to enhance all aspects of your endodontic care based on current evidence and best practice.

The course will be presented with interactive seminar-styled, case-based lectures and hands on components using natural teeth. An operating microscope, digital radiography and ultrasonics are utilised. Each day the course will build on the previous day's learning and will follow a progression through the entire endodontic process.

During this program practitioners will learn:

- Canal location using ultrasonics
- Morphological variations including MB2 and mid mesials
- Definitive shaping techniques minimum file strategy
- Line angle (LA Axxess) preps with dentine conservation strategies
- Understand irrigation protocols and what to use when
- Mastering warm vertical condensation

This course is accredited with 12 hours CPD*

Participants are encouraged to bring accessed extracted teeth, as well as loupes. All other materials will be provided. At least two premolars and two molars are recommended for the course. Please access these prior to the course.

Study & Ski on the CPD

Queenstown Friday 15th and Saturday 16th September 2017The Sofitel Queenstown, 8 Duke Street, Queenstown

These courses are accredited with 12 hours CPD*

Contact The Sofitel Queenstown to book Special Accomodation Packages available for Attendees!

Please make your reservations by either calling or emailing the Sofitel reservations team and quoting '*Dental Conference*' to access the discounted rate. All enquires are subject to availability. reservations@sofitelqueenstown.com or +64 3 450 0050

Kerr Professional Education presents

Peter Cathro (MDS, Cert Tert T, PhD)

Endodontic Success

Success, the steps to achieve... **Kerr**

CPD*
HOURS

A full-day course includes half-day lecture & half-day hands-on workshop...

Endodontics can be a technically demanding aspect of dentistry. However, with the continued advancement of technology, the predictability of treatment can be enhanced, along with your enjoyment in providing it. The aim of this course will be to update participants with some of these advancements and provide useful and practical tips to enhance practitioners confidence when undertaking root canal treatment.

During this program practitioners will learn:

- Endodontic access and length determination.
- Access (includes anatomy) and negotiation
- Root length determination and how to optimize the accuracy of the electronic apex locator.
- Microbial control techniques: Chemo-mechanical preparation of the root canal system.
- Root canal preparation with biologically based nickeltitanium techniques with the focus on reciprocation motion
- Irrigation and Medication Traditional vs. Contemporary concepts.
- Current Obturation concepts and trends
- There will be a particular focus on the warm vertical condensation
- Management of difficult cases.

This course is accredited with 6 hours CPD*

Peter Cathro (MDS, Cert Tert T, PhD)

Upon completion of his specialist training in Endodontics (1994), Peter worked as an endodontist in full time private practice in Melbourne and then in Auckland, New Zealand. Peter later took a position as a Senior Lecturer at Otago University (New Zealand) before becoming Associate Professor and Head of Discipline at the University of Adelaide (Australia) for seven years.

In addition to teaching undergraduate and post-graduate students, Peter has lectured extensively at international conferences and given numerous endodontic hands-on courses throughout Australia, New Zealand and Asia. Peter has recently returned to Otago University and is an Associate Dean (Clinical) and has completed his PhD in microbiology. In addition, Peter maintains an academic appointment with the University of Adelaide as Adjunct Associate Professor. Peter is past president of the NZ endodontic society and is now editor of the NZ Endodontic Journal and a reviewer for three other journals.

Kerr Professional Education presents

Dr Torsten H Steinig
D.D.S. (MHH) Dr. med. dent. (MHH) MS (BCD) CERT. ENDO. (BCD)

Contemporary Endodontics for the General **Practitioner**

A full-day course includes half-day lecture & half-day hands-on workshop...

Are you carrying out endodontic treatments in your general dental practice? Do you find that endo is one of the more stressful procedures, with high patient expectations which may or may not be met by the treatment provided? Do you sometimes wonder why the treatment may not be successful, even though "it looks nice on the radiograph"? Are you unsure as to which cases may have a favourable or unfavourable prognosis? Would you like to find out which cases you should rather refer for assessment and possible treatment?

Then this course is for you...

Dr Torsten Steinig is an experienced endodontist, who has been practicing in Sydney for 9 years.

He will break down the complex procedure of "non-surgical endodontic treatment" into a set of clearly defined and easy-tofollow steps, which are essential if you want your treatment to be successful.

Torsten will introduce you to "reciprocation", the new buzzword in rotary instrumentation. What are the benefits of reciprocation? A new endodontic file system "Twisted Files Adaptive" is presented, which takes a lot of the stress out of rotary instrumentation. With its intuitive set-up, it is easy to follow without the need for complex file sequences and will therefore integrate perfectly into your busy general practice.

Do take the opportunity to spend a day with one of Sydney's preeminent endodontists and "pick his brains" about ways to improve your skills in endodontics.

This full-day course has been running for a few years and consists of lectures/discussions as well as hands-on segments. Comprehensive handouts will be provided.

Sydney Saturday 3rd June 2017

ADA Centre for Professional Development 1 Atchison Street, St Leonards NSW 8:30am - 5:00pm

This course is accredited with 7 hours CPD*

Dr Torsten H Steinig

D.D.S. (MHH) Dr. med. dent. (MHH) MS (BCD) CERT. ENDO. (BCD)

Dr Torsten Steinig graduated from Baylor College of Dentistry in Dallas, Texas (2004) with a Certificate in Endodontics, and an M.S. degree in Oral Biology. He worked as an endodontist in private practice in Dallas, Texas, prior to returning to Australia in 2006.

Prior to his residency in endodontics, Torsten graduated from the DDS program at the Medical College of Hanover, West-Germany (1989), and completed a concurrent post-doctoral degree in 1990 (Dr.med.dent.). He worked in general dental practice in Melbourne for ten years, and held public office with the Australian Dental Association.

Torsten has published numerous scientific articles and presented at international conferences, and in 2003 was awarded the first prize by the American Association of Endodontists (AAE) for his presentation on the use of MTA® in apexification cases. His research on the topic of "Pain in Endodontics" was supported by a grant from the research foundation of the AAE.

He is a member of the scientific review committee of the Journal of Endodontics (USA), and holds active membership in various professional organizations dedicated to the advancement of endodontics and the treatment of dental trauma.

Dr Torsten Steinig has been in full-time endodontic specialist practice in the heart of Sydney since 2006, and has recently relocated to his new premises: Sydney City Endo at Level 6, 64 Castlereagh Street, Sydney.
