SUPERIOR STRENGTH
& AESTHETICS

LUNA 2

UNIVERSAL COMPOSITE

- Improved non-stick, non-slump handling and reliable mechanical properties
- Logical Shade Matching Technology for easier and accurate shade selection
- BPA free
- Very high radiopacity of 250% AI
- Flexural strength similar to dentine for Class III, IV and V restorations and proximal boxes
- Opalescent and fluorescent like the tooth for lifelike results

PERFECT FLOW
PERFECT STAY

LUNA FLOW

UNIVERSAL FLOWABLE COMPOSITE

- Exceptionally high compressive strength of 421 MPa and 128 MPa of flexural strength
- Flows on demand, holds its shape and does not string for maximum control over application
- Outstanding radiopacity of 265% AI for faster and more precise diagnosis
- Logical Shade Matching Technology for easier and accurate shade selection
- Two viscosity options for all clinical indications: Luna Flow offers medium/high viscosity and Luna Flow LV offers low viscosity

Professional LED Curing Light

Smarter design. Optimal cure every time.

Target assist precision curing

Radii Xpert's unique target assist technology enables you to correctly position the light and be confident of the angulation before curing. A light source must be held close and perpendicular to a restoration to avoid incomplete polymerization¹. By activating the positioning light and releasing once over the tooth, you can be sure that curing only begins when the light is in position and restorations will receive a complete cure. Ensure you are on target every time with Radii Xpert.
